About Company

01 Company Background

Kenrom Chemicals Limited is an all-round chemical private established company in Uganda fully specialized in the manufacture and supply of Industrial and Institutional chemicals.

Kenrom's activities are dedicated to the Industrial sector in its large scale and the company offers an all-inclusive service going from the problem identification to onsite deliveries.

The assets of our company consist of the establishment of a platform that allows our customers to focus on their operations to prevent production losses because of the true level of engagement between our staff and the customers.

Kenrom Chemicals Limited has realized a milestone of achievements from its inception in 2015 till now including gaining three ISO Standard certifications in Quality Management Systems (QMS) ISO 9001:2015, Environmental Management Systems (EMS) ISO 14001:2015 and Occupational health and safety management systems ISO 45001:2018, obtaining a URA prestigious AEO Certificate after being one of the most tax compliant company and having more production equipments to improve and increase on output. The number of staff has gradually increased to provide support for all operations.

Today, Kenrom Chemicals Limited maintains 3500 square feet of its manufacturing facility, at Kyengera a suburb of Kampala City. Of this available space, only 60% is currently utilized for production, implying that there is still room for production. And most of the company's supplies are within the country, although there are supplies, that are made to the rest of the East African countries and to DRC.

Kenrom Chemicals Limited will soon expand its operations to other locations within Uganda besides the current location at Kyengera and to the rest of Africa.

Business and Market Sectors

02 BUSINESS AND MARKET SECTORS

Kenrom Chemicals Limited has made a revolution in the Chemical industry sector by the range of services that it offers to customers ranging from competitive sourcing to the supply of appropriate solutions permitting a real time management of the processes. The company provides solutions that meet all customers' needs focusing on the decrease of costs/risks in production. For example, the aim of Kenrom is to provide all the expertise and the solution for the reduction of the customers' costs while keeping revenues high for customers. Kenrom is also active in the sourcing part. Therefore, our principal services are focused on:

1. Global sourcing to focus on benchmarking.
2. Effective and timely order processing and deliveries.
3. Full-time assistance service (fulfilled by our team which has technical competence needed to face and solve any problem.

Our Commitment

We are committed to the following:

Providing customer satisfaction through outstanding quality, consistent with customers' requirements

Providing and maintaining an adequate safe work environment for our workers, contractors and visitors

Avoiding undue risk to human health and adverse impact to environment

Preventing injury and ill health

Complying with and satisfying legal requirements in areas of operation

Continual improvement of the IMS

Measuring the achievements of the continual improvement by setting up and monitoring objectives and targets for our IMS performance indicators

Ensuring consultation and participation of workers in matters affecting operations and related to IMS

Board Of Directors

Kenrom Chemicals Limited was established in 2015 by two directors, Mr. Bukenya Fred and Mr. Muyingo Robert, plus two minors. Initially, the directors resold products bought from local manufacturers. They later decided to shift to production, investing resources to build a plant. The company's reputation is built on high-quality products, customer satisfaction and superior service. Kenrom currently has an operational branch in Nairobi, Kenya, formed by partnering with two new directors: Mr. Dominic Ndeti and Mr. Ndungu Simon.

Meet The Team

The input by a team of dedicated personnel within the different departments has seen Kenrom Chemicals Limited realize high output to meet the customer needs and this has also enabled Kenrom Chemicals Limited to operate maximumly and ensuring that accountability at every level of operation is realized.

Kenrom Chemicals Limited has got its Core operations supported by eight departments as follows:

1. Quality.
2. Production.
3. Engineering.
4. Transport.
5. Finance/Sales.
6. Procurement.
7. Stores/Warehouse.
8. Human Resource/Administration.

These departments autonomous operations characterized by interdependence allow team cohesiveness.

Quality Department

The Quality department spearheads local and international quality standards, ensuring they are the basis for manufacturing products to customer specifications. Kenrom Chemicals Limited is certified in several

IMS standards, which has enabled the standardization of all operations:

ISO 9001:2015 (Quality Management System)

ISO 45001:2018 (Occupational Health and Safety)

ISO 14001:2015 (Environmental Management System)

A three-person team manages and promotes quality standards for products, raw materials, and human operations, guaranteeing high-quality output. The team also ensures full compliance with national and international Environment, Safety, and Health (ESH) regulations, including standards set by NEMA, MGLSD, UNBS, and International OSHA.

Production Department

As the main activity of Kenrom Chemicals Limited, several products are manufactured to meet the Customer requirements. The products classified under acidic and base chemical composition are manufactured and Kenrom has got the required equipment to realize this production process and having reliable power sources including a back-up stand-by generator.

The engineering solutions embraced at Kenrom have seen the introduction of technological advancements to include auto filling units and a plan to have conveyor belt systems.

The Production department with eleven energetic staff including the casual staff are a vibrant and dedicated team who ensure that production is done with customer focused procedures including meeting the Quality standards as guided by the Quality department

Engineering Department

The Engineering department is responsible for all Engineering solutions including ensuring that all machinery and electrical components are functioning well for all production processes to be successfully done. The Engineering team in conjunction with the Quality and Production teams engage fully in production and coordinate to have smooth operations.

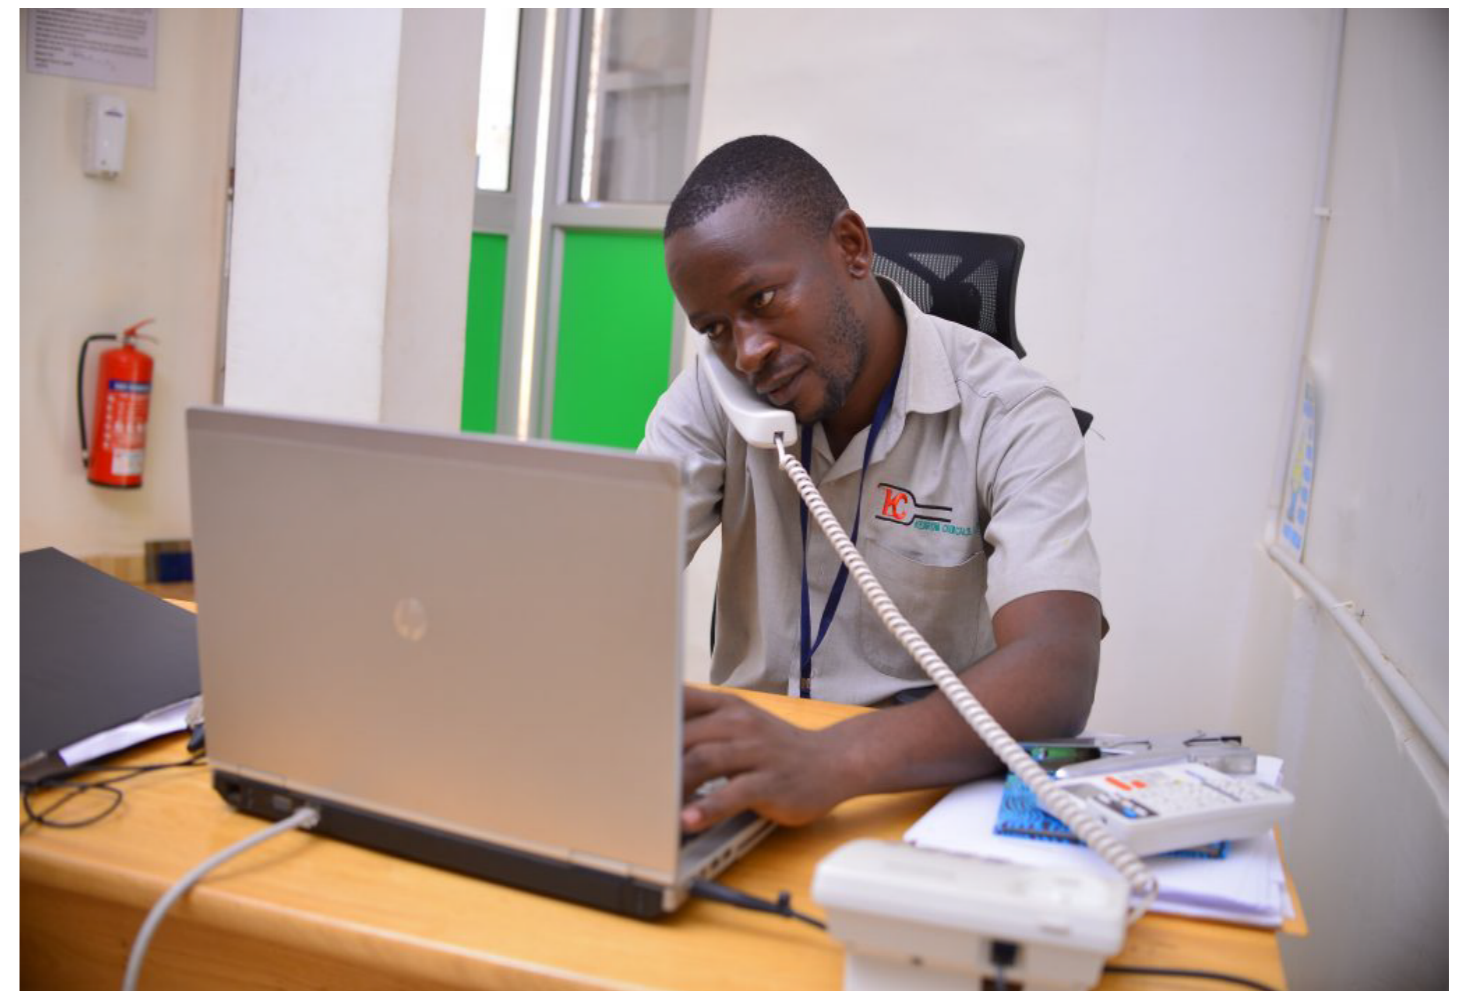

The three manned team is committed to ensuring that there is less or no lost time due to breakdown of machines, electrical components and other gadgets and they engage in daily, weekly and monthly inspections as a preventive maintenance plan for managing this. They detect or identify problem areas with the functionality of the machines or other components and will engage in servicing/repairs.

Transport Department

The Transport department is always tasked to ensure that customers' products are delivered safely and in the right amounts, this is made possible by meeting all requirements for smooth operations including having well maintained/serviced vehicles/trucks, Insurance policies for motor vehicles available during transit and good time management to reach the Customer sites in the required time frame.

The six manned team is dedicated to fulfilling Kenrom's goals that involve satisfying the customer needs through exhibiting vibrancy and determination with much of their time given to make customer deliveries on a daily basis to near and far customer sites.

Finance Department

The Finance department is always tasked to manage the company's financial health by engaging in the Accounting duties that deal with the company's assets, Income and expenses. They streamline all financial requirements from the company's operations through budgeting, auditing and allocating financial resources.

A three manned team is always focused on meeting customer requirements to have bulk purchase orders from the Customers fully delivered in a period of time through a coordinative process with the Stores department. This is followed by the invoicing which is done by following the URA legal requirements.

Procurement Department

All sourcing for tangible items (stock and non-stock items) and non-tangible items (services) is managed by the Procurement team at Kenrom and the two manned team is focused on acquiring good quality of all these items due to the need for conformity to the QMS/IMS standards with one of the key principles involving customer focused operations to produce good quality products and services for the Customer.

The Procurement and supply chain management processes are handled with expertise by the team to set the ball rolling as the very first operation to enable other core operations to kick-start including among others Production.

Stores/Warehouse Department

The Stores department is dedicated to ensure good/proper storage/management of the raw materials and products. All required procedures from the point of receiving items into the Warehouse to the point of dispatching these items are utilized including ensuring that the good quality of items is maintained by prioritizing good house keeping, proper stacking, cleanliness, tidiness, consideration for raw materials and products expiration and safety while executing all duties in the warehouse/stores.

With more than 100 products and raw materials in storage, the three manned team ensures that all inventory is well maintained and the use of the inventory system to record stock in and out and also engaging in the monthly stock take exercise is very instrumental to determine proper management and storage of all inventory.

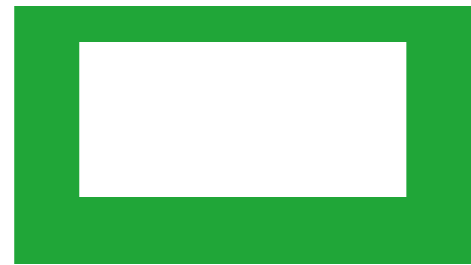

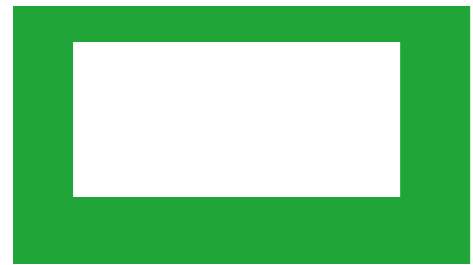

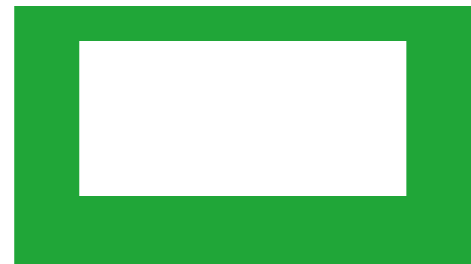

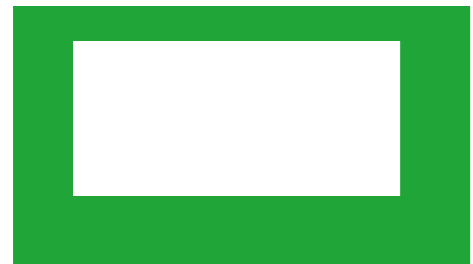

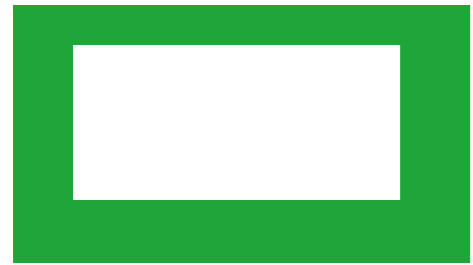

Human Resource/ Admin Department

The Human resource department is responsible for the administration of all procedures/processes dealing with human resources/employees at Kenrom involving sourcing, onboarding, maintaining the workforce, improving performance of the workforce and off-boarding. These core procedures are supported by the commitment of the HR department to engage in activities including preparing for and holding interviews, preparing and issuing employee contracts, engaging in performance evaluations, ensuring employee retention and their welfare through benefits administration etc.

The two manned team with the Head of HR and Administrator are dedicated to ensure that matters involving the quality of services employees offer, the working environment, work relations and their wellbeing is well managed to have good quality output and as per the IMS vstandards.
